Abstract

- PimonX is a project that helps link start-ups to investors thus generating capital for startups and also providing a secured platform for investors to invest their funds. Our plan is to create a more concrete and secure digital investment platform by ensuring security and return of investment of investors funds. It is a low-risk, high-probability investment project that will help solve the problem of loosing investment capitals thus Redefining the general world view of digital investment and financial
- as a high-risk, unsafe and highly insecure market. Investors will also make use of our non-custodian exchanger that allows the generation and redeeming of custom gift cards.
- In summary, we are presenting to the world a solution to the increasing rate of losses in modern-day crypto investments by offering a lower-risk, higher probability, safe and secure investment platform called Pimon-X.

Introduction/Problem Statement

- In 2008, the first of its kind digital currency project was launched and since then, the world of digital investment has become wider and is rapidly expanding with more and more ICO's springing up. Since 2008, the number of altcoins has increased on a geometric scale to over 3000¹.
- Below is a graphical chart showing the violent rise in the number of ICO's from Jan 2016 to Nov 2017.

Introduction/Problem Statement

- It's very impressive to see how much ICO's have sprung up since the introduction of digital currencies, BUT, in a stress test conducted by Roger Bryan, founder of the *DIGITAL CURRENCY INDEX*, it showed that out of the over 2000 ICO's that have sprung up, a very little number of them proved competence and posed to have a future from his stress test. The thought of this has made the crypto currencies to look risky for intending investors.
- This along side with other factors has made the modern day investor extremely savvy or very skeptical and unsure of where to invest his funds.

PimonX : Our Solution

- We at PIMON-X understand perfectly that an investor is meant to get returns on his investment. According to **the times of India³,. A smart investor is one who chooses right financial product keeping needs and goals in mind to earn maximum return on investment.** We would also say that a smart investor is one who maximizes profit and reduced losses through investment into low-risk, credible businesses. So we at PIMON-X want to ensure the financial safety of our investors.

Investment

- PIMON-X links up start-ups to investors thus giving the startups an extra push in their uprise.
- PIMON-X, obviously, serves as a fundraising platform for inferior companies that are hoping for investment and sponsorship and also an investment platform for smart investors.
- To ensure security startups are will undergo verification using KYC and AML processes.
- After passing these verifications - if passed, they then undergo a second verification process carried out purely by PIMON-X to check their authentication and plausibility to ensure competence. This will assure a lower risk in investment as investors.

Payments/Transactions

- Financial transactions and exchange of coins will be carried out through PIMON-X wallet and exchanger
- Large and small funds can be sent **anonymously** without a wallet address to anyone. The only things needed is your **secret key** and **redemption pin**.
- Our non-custodian exchanger also allows the generation and redemption of custom gift cards.

Our Beliefs

- We, here at PIMON-X, believe that we all have the obligation to advance and sustain the financial inclusion.
- We also believe that a low-risk investment token and a faster payment and transaction system will increase global economy and facilitate more commercial activities.
- We believe that every individual should have the right to control his income and reap returns on plausible investments.
- We believe that a global cashless system will make way for greater good.

PimonX The Description

- Going on to a deeper explanation of this project, we stand as the middle man between **start ups** and **investors**. PIMON-X is a platform that helps aid the investment of funds into these startups and ensures the security and safety of the investors funds.
- Before any start up company is listed, it undergoes a set of verification processes, which is rather critical, to make sure that the startup is viable and credible.
- After the verification processes, a review of the company's business plan will be done to check its competence and it's probability for success.
- Lastly, legal document agreements will be reached.
- Agricultural, educational, financial, real estate start ups and a lot more categories will be included to expose our customers to a wide range of options, investment plans and percentage profit per investment.

PimonX The Description

- All these investment options and information will be available in the PIMON-X mobile app to make investments on the go.
- When a company is listed, they present their entire investment package. Their offer will be stated plainly in their overview.
- While these companies work for the returns for the investors, PIMON-X ensures the security and safety in transactions.
- Indeed, it is a low-risk, high probability, safe and secure investment platform that we present.
- PIMON-X also has it's own personal wallet which enables an investor to save funds in variety of forms. The wallet is fused together with the PIMON-X investment app.
- Our exchanger helps each investor convert coins to whatever coin they want. It exposes you to a wide variety of coins and options thus increasing your exposure to the crypto world. Through the non-custodian exchanger, generation and redemption of custom gift cards will be made possible.

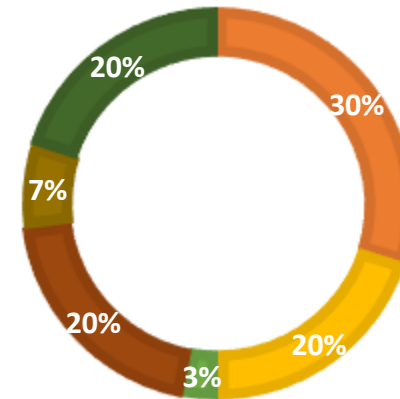

Why Invest in PimonX

- PIMON-X eco system has a target and is aimed towards growth and expansion.
- The success of PIMON-X eco system is not tied to crypto market price movement and manipulation therefore investors are assured of our growth by the execution of our said mission.
